

ABDULAZIZ MUSTAFA AMORI

Full-Stack Developer | Mobile, Web & AI

Jeddah, Saudi Arabia | +966 579349058 | abdulaziz.amori10@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Technical Skills: Flutter, Dart, Swift, Java, Nuxt.js, Next.js, Laravel, Node.js, Vue.js, Clean Architecture, Software Architecture, MVVM, MVC, OOP, SOLID, Design Patterns, Cubit, Provider, GetX, REST APIs, Dio, HTTP, JSON, Firebase, Google Maps, CI/CD, App Store & Play Store, Testing

AI/ML: Python, TensorFlow, Keras, Scikit-learn, ML/DL, NLP, LLMs, RAG, Data Processing, Model Training & Evaluation, Vector Search

Tools & Platforms: Firebase, Git, GitHub Actions, Android Studio, Xcode, VS Code, Agile, UI/UX, Multithreading, Dependency Injection, Linux/macOS/Windows

Experience

Alfiya United Company – Mobile & Web Developer | Backend Developer | AI Integrations, Jeddah, Saudi Arabia (On-site)
May 2026 – Present

- Developed and maintained the Al Hdeed mobile application — a steel & construction materials marketplace serving the Saudi Arabian market.
- Integrated Moyasar payment gateway to enable secure and seamless online payment processing within the application.
- Built and integrated backend services and REST APIs supporting mobile and web client applications.
- Developed web application features alongside mobile development, contributing across the full product stack.
- Implemented an AI-powered voice ordering feature, allowing users to place orders using voice interactions for a smoother user experience.
- Developed an intelligent feature that calculates project cost from architectural and structural drawings, helping users estimate material and project costs more efficiently.
- Integrated AI-powered features and services to enhance product functionality and user experience.

ABS.AI Technologies – Flutter Developer, Cairo, Egypt (Hybird) Aug 2024 – April 2026

- Built scalable Flutter applications integrated with REST APIs, Firebase, Google Maps, PayMob, AppMetrica, and Meta Ads for analytics and marketing tracking.
- Implemented secure networking using Dio/HTTP with JSON serialization, pagination, caching, and robust error handling.
- Designed and developed real-time features including live location tracking and dynamic updates.
- Applied Clean Architecture, Cubit/BLoC, and SOLID principles; optimized performance and managed CI/CD pipelines with GitHub Actions while supporting App Store and Play Store releases.

TechnoColab Inc. – Machine Learning Intern, Remote, India

Jul – Nov 2023

- Built predictive ML models and optimized data pipelines using TensorFlow and Scikit-learn.
- Applied data preprocessing, feature selection, and model evaluation for real-world datasets.

Projects:

- Al Hadeed ([Play Store](#) | [App Store](#))
- Al Hadeed Provider
- Al Hadeed landing Page ([Website](#))
- Al Hadeed Web App ([Website](#))
- Al Hadeed Admin Dashboard
- Al Hadeed Provider Dashboard
- Whale Tail Academy ([Play Store](#) | [App Store](#))
- Whale Tail Dashboard
- School Finder ([Play Store](#))
- Al Alfy App ([Play Store](#) | [App Store](#))
- Al Alfy Driver ([Play Store](#) | [App Store](#))
- Match Egypt ([Play Store](#) | [App Store](#))
- Match Egypt Restaurant ([Play Store](#) | [App Store](#))
- El Akaber App ([Play Store](#) | [App Store](#))
- El Akaber Dashboard
- ResalTk Admin App ([Play Store](#) | [App Store](#))
- Mazaq Al Lahim App ([Play Store](#) | [App Store](#))

- Amazon Product Browse Node Classification
- Drug recommendation System (Deep Learning)
- Q&A Chatbot using LLMs and RAG (Retrieval-Augmented Generation)
- AI Generated Text Detection (Neural Networks)
- Arabic Customer Review Classification (NLP)
- Corporate Bankruptcy Prediction
- Bank Debit collection Analysis

Certifications

- Flutter & Firebase
- Advanced Learning Algorithms
- Google Data Analytics
- Supervised ML
- Unsupervised ML

Education

Nile University – Giza, Egypt

B.Sc. in Artificial Intelligence (Graduated 2024)
